New DI601/DDI602 outdoor motion sensors

Detect outside, protect inside

Security starts from outside... protect your premises with our new outdoor motion sensors!

The DI601 and DDI602 deliver extremely precise, reliable presence detection outdoor. They're designed for use in CCTV and intruder alarm systems.

The DI601 PIR Detector is an outdoor motion detector and alarm trigger that uses two independent passive infrared detectors integrated into one housing. This quad pyro technology delivers precise, reliable presence detection whilst avoiding false alarms.

The DDI602 includes a microwave sensor module which provides a higher level of detection as all three sensors (2 PIR's + microwave) must be activated in order to trigger an alarm.

- Variable mounting height: up to 6m
- Electronic range setting: 10/20/30m
- Attractive design
- Operating temperature: -30 to 65 °C
- IP65 approved for dust & humidity resistance
- Built in EOL resistors
- 10 to 70° detection angle
- 180° pan & 90° tilt for flexible installation
- Masking sliders and adhesive mark to tailor the field of view (e.g. to match it with a camera, to achieve PI)
- Discreet sensor module
- 5 years warranty
